### Suggested Search Terms

Try searching a few of the phrases provided in PsycINFO and ABI/INFORM, and use appropriate limiting features in each database to restrict your results to those articles which meet your assignment criteria.

#### [PsycINFO](#)

Tips: Limiting to Peer –Reviewed Journals is done after the initial search; however by using the Methodology\* limiter (under More Search Options) you will *nearly* accomplish the same thing. The abstract should tell you if this article is useful and you can use the Descriptors on the right to edit your search if necessary.

#### [ABI/INFORM Global](#)

Tips: Limit to Scholarly Journals. See the Suggested Topics at the top of the page for ideas. Scan the abstract and look at the Indexing for other subject terms. Add studies or analysis to your search as a subject to further narrow your results.

<u><a href="#">PsycINFO</a></u>	<u><a href="#">ABI/INFORM Global</a></u>
person environment fit* and theories* and 3600	P-E fit and Empirical
