Forging New Directions in Scholarly Communications

Background

The complexity of research in the 21st century, coupled with the transformation of information technology and the heightened scrutiny of responsible conduct of research issues, has presented challenges with effective knowledge management.

A series of resources and services were identified to provide support for library users on campus in the creation, access, dissemination and preservation of knowledge in accordance with responsible conduct of research practices.

Scholarly Communication Services

Greater Visibility, Greater Access

QSpace Queen’s University Research & Learning Repository

OJS@Queen’s Publish and Manage Your Journal Online

- Increased visibility and citation counts for published and unpublished research.
- Timely distribution of research results.
- Organized access and long-term preservation of scholarly work.
- Easy information distribution and management.

Open Access

Queen’s University Library is committed to the principles of Open Access (OA) to all research results and educational resources. The Library includes OA resources in its collection and believes in the importance of promoting modes of scholarly communication that enable people to share knowledge as broadly as possible.

BioMed Central
Directory of Open Access Journals (DOAJ) membership
Open Medicine
The Scholarly Publishing and Academic Resources Coalition (SPARC)
