

# PCensus 10 for MapPoint – Basic User Guide

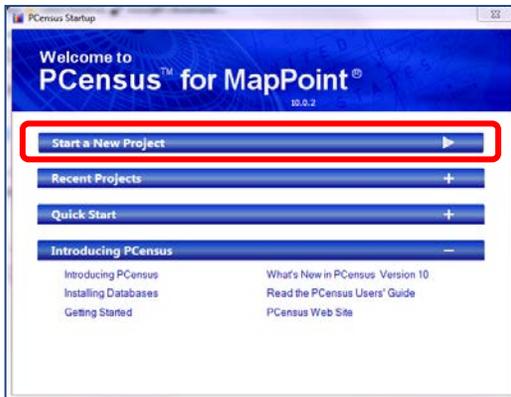

## To obtain statistics for standard Census geography

Aug 2012

### 1. Open **PCensus for MapPoint**

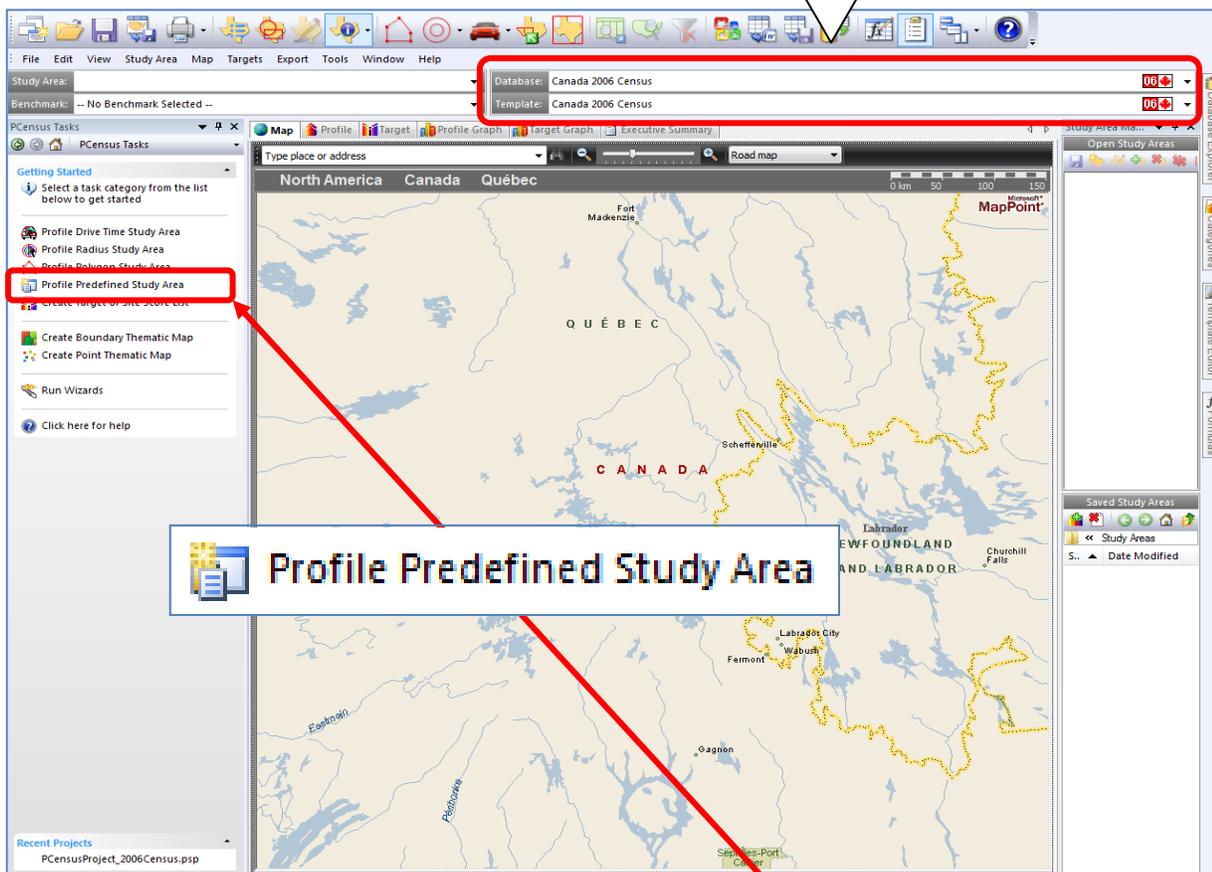

- Login to the Library Computer you are working at using your NetId.
- Open the desktop folder that contains **PCensus** software ('Humanities & Social Sciences Research Databases').
- Open '**PCensus for MapPoint**'.

### 2. On the “Welcome” screen, Click on “**Start a New Project**”

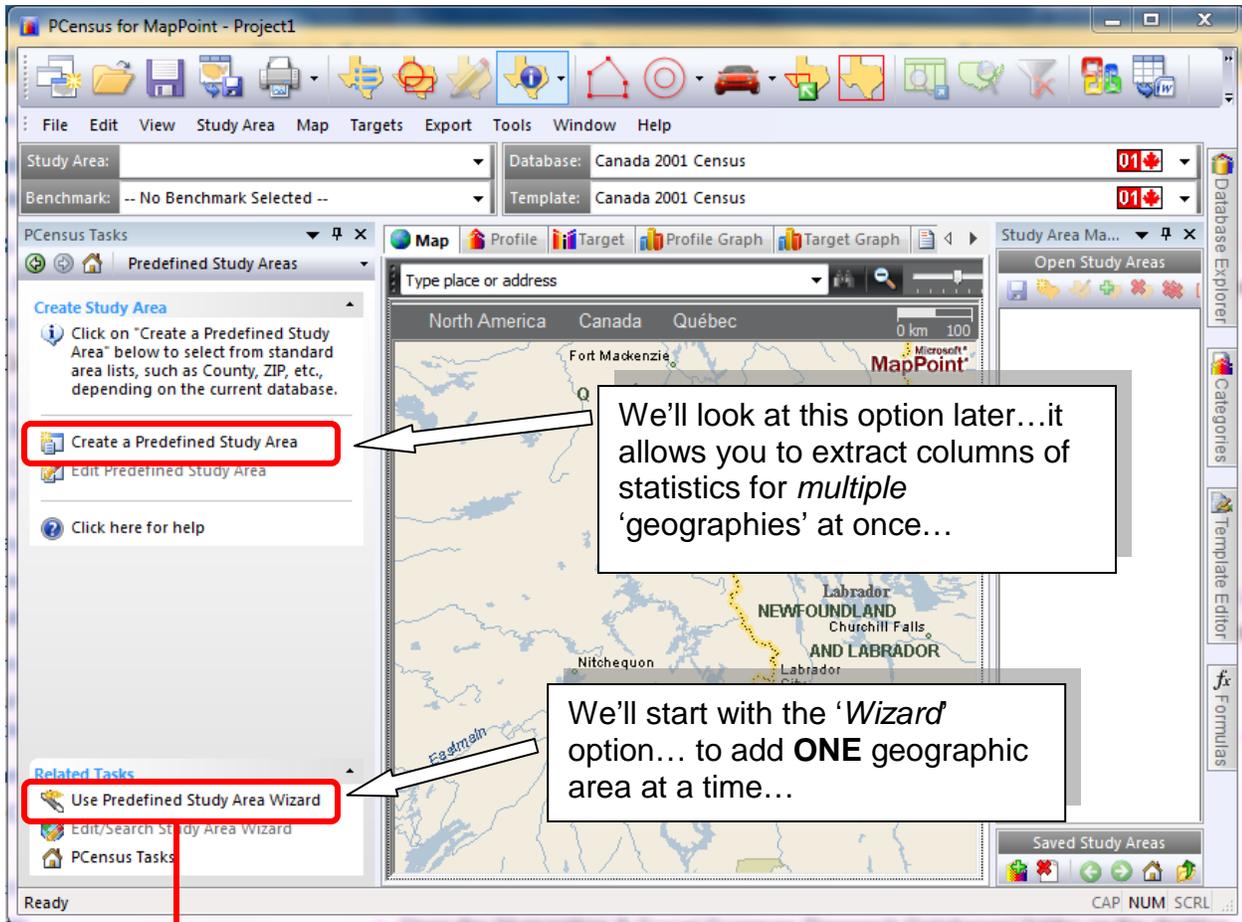

You'll get taken to the screen below.

**NOTE:** You need to change to the *Database* for the Census year you want: In this case, the **Canada 2006 Census** database has been selected.

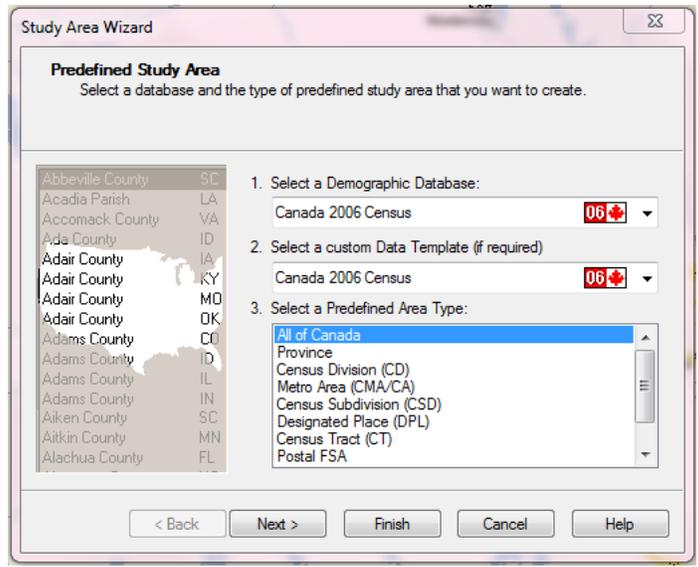

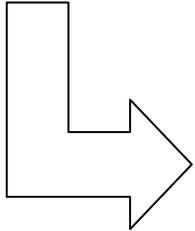

### 3. Then, on the left-hand menu, choose “**Profile Predefined Study Area**”

4. Here, you'll have **two choices**:

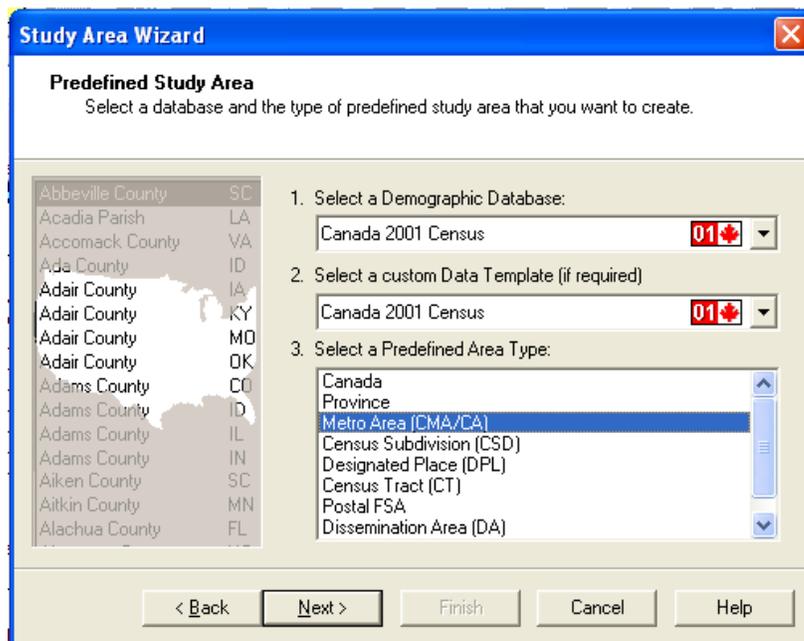

4.1. If you want to add **ONE** geographic area at a time to your results, select “**Use Predefined Study Area Wizard**” (bottom left-hand corner):

 Use Predefined Study Area Wizard

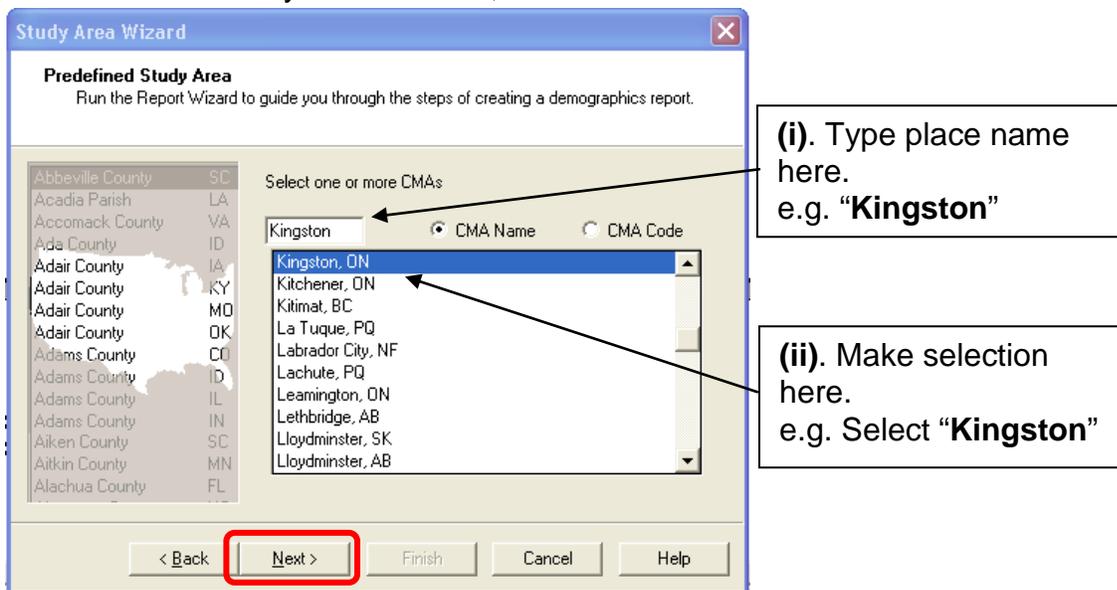

- (i) The 'Demographic Database' should match your template choice (e.g. Canada 2006 Census)
- (ii) The 'custom Data Template' should match as well...
- (iii) Select a 'Predefined Area Type' (e.g. Metro Area (CMA/CA)...)

(iv) Click "Next".

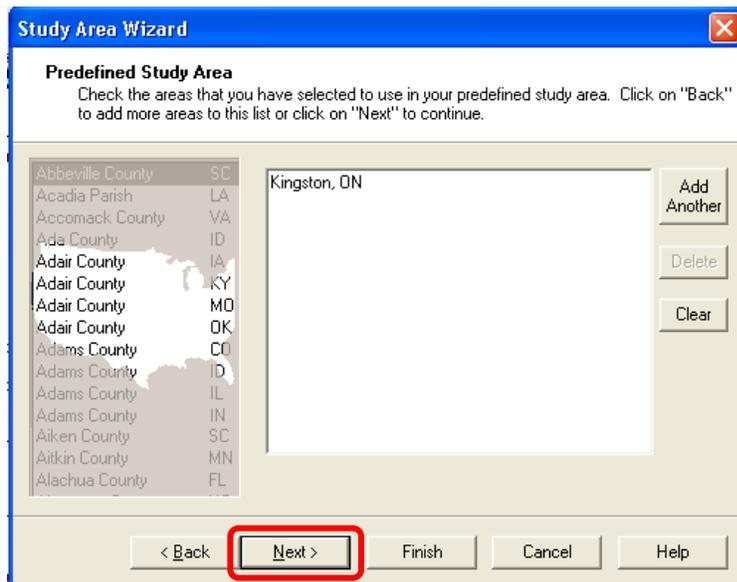

(v) On the "Predefined Study Area" screen, **Select one or more CMA's**.

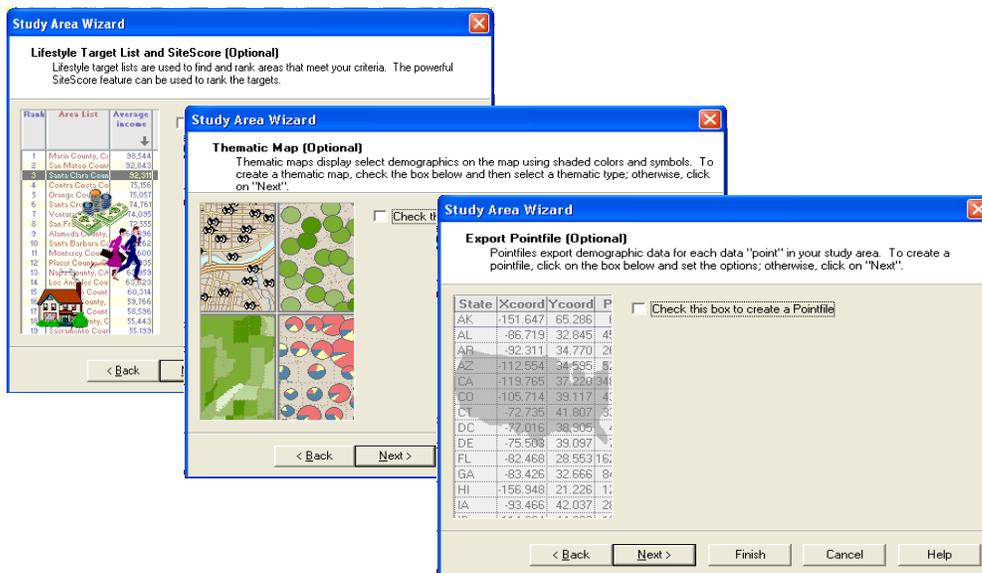

(vi) Click "Next".

(vii) On the "Predefined Study Area" screen, Click "Next".

**NOTE:** Click on "Add Another" if you wanted to add more geographic areas, but note that statistics for all areas will be *summed* for display in **ONE** column.

- (viii) The next three screens provide you with a variety of output options, which go beyond displaying columns of statistics on the computer screen (which is the objective we're working toward in this guide).

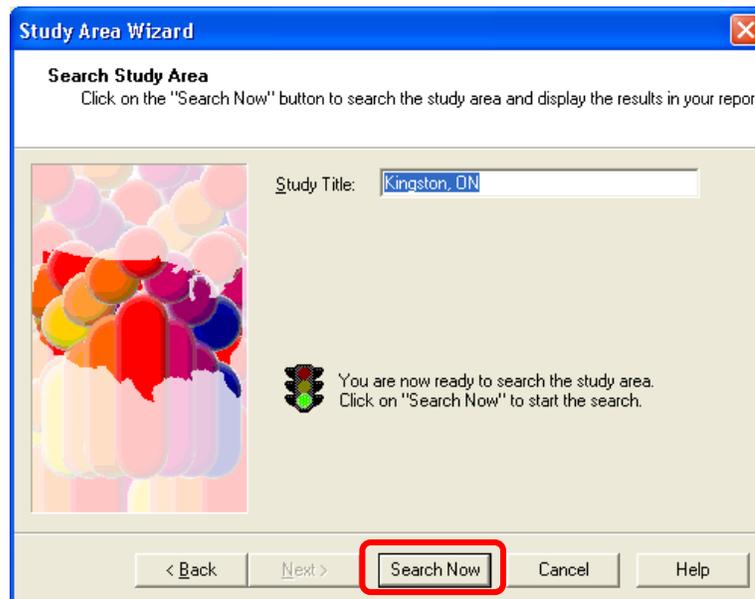

For your information, these options include:

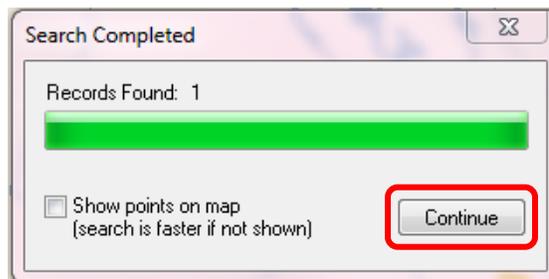

- a. **Lifestyle Target and Site Score:** This lets you define a lifestyle based on a Census characteristic (e.g. average income) and retrieve a list of places ranked based on this characteristic (e.g. a list of Census Tracts in Toronto, ranked from high to low average income).
- b. **Thematic Map:** This option allows you to create basic thematic maps based on a Census characteristic (e.g. percent French speaking). Generally, this mapping feature leaves a lot to be desired.
- c. **Export Pointfile:** This option exports a ".dbf" (spreadsheet-friendly) file containing statistics for the sub-parts of the larger geography you have chosen (e.g. Census Tracts for all of Toronto)

For now, Click “**Next**” on each of these screens to skip over them.

(ix) On the “**Search Study Area**” screen, Click “**Search Now**”.

(x) On the “**Search Completed**” dialog box, click “**Continue**”

(xi) Results should appear in a column, as shown below.

2006 Census Census Snapshot		Kingston, ON	
<b>Total Population</b>		152,360	%
Males		74,175	49%
Females		78,185	51%
<b>Population by Age</b>		152,360	
0 to 4 years		7,280	5%
5 to 19 years		27,500	18%
20 to 24 years		11,200	7%
25 to 34 years		18,070	12%
35 to 44 years		22,375	15%
45 to 54 years		23,210	15%
55 to 64 years		18,480	12%
65 to 74 years		12,115	8%
75 to 84 years		8,430	6%
85 years and over		2,830	2%
Average age of population		40.2	
Median age		40.6	
<b>Families</b>		42,995	
Persons per family		2.8	
Two-parent families		36,450	85%
With no children at home		18,105	42%
With children at home		18,350	43%
Lone-parent families		6,540	15%
Children per family		1.0	
<b>Households</b>		61,980	
Persons in private households		147,480	
Persons per household		2.4	
Average household income	\$	69,185	
<b>Owned Dwellings</b>		61,980	
Owned Dwellings		41,815	67%
Rented Dwellings		20,230	33%
Dominant building type		Single detache...	
Dominant period of construction		1971 - 1980	
Average value of dwelling	\$	242,600	
Average gross monthly rent	\$	773	
<b>Top 5 visible minorities</b>			
Chinese		30%	
South Asian		22%	
Black		14%	
Latin American		9%	
Filipino		6%	
<b>Dominant Demographics</b>			
Official Home Language		English	
Non-official Home Language		Chinese	
Recent Immigrant Places of Birth		Eastern Asia	

(xii) To create another column of statistics (e.g. for another geographic

area), **Click on the “Texas” icon**. This will open the **“Predefined Study Area”** screen, that you encountered in *Step 5.1*, above. Continue from this point to retrieve statistics for another geographic area.

**NOTE:** You can repeat this process as many times as needed, but keep in mind the following *more efficient alternative method* for multiple geographic locations.

**4.2. If you want to add multiple geographic areas (of the same type\*) to your results, select **“Create a Predefined Study Area”** (in the left-hand menu):**

On the Predefined Study Areas screen, choose the type of geography you want (left column), then select the specific places you want (middle column), then click the right arrow to move these selections to the right column.

\* e.g. Provinces, Census Divisions, Census Subdivisions, Census Tracts, etc.

**2. Select your geography here**

**3. Click the right arrow to move selected geography into the 'Selection Builder' column**

**1. Choose the type of geography here (e.g. Province)**

**NOTE:** With this ticked, you'll get a column for each Province selected...

**4. Click OK**

Provs	Code
Alberta	48
British Columbia	59
Manitoba	46
New Brunswick	13
Newfoundland	10
Nova Scotia	12

Yukon Territory	60
Northwest Territ...	61
Nunavut	62

**Profile Individual Areas**

13 profile columns will be generated. Are you sure you want to continue?

**Yes** **No**

When prompted about columns, choose 'Yes'.

Note the other levels of geography you can choose... these include: Census Divisions (i.e. Counties), Census Metropolitan Areas and Census Agglomerations (CMA's and CA's), Census Subdivisions, Census Tracts (CT's) and more...

**CAUTION:** This method creates a column for every 'geography' selected – use caution as this can generate a very large number of columns. This can take time; be patient.

You should get a column of statistics for each 'geography' you selected.

2006 Census Census Snapshot	Kingston, ON	Newfoundland and Labrador	Prince Edward Island	Nova Scotia	New Brunswick
